

Dr.-Ing. Michael Op de Hipt

Partner

Dr. Michael Op de Hipt brings over 25 years of practical experience from the manufacturing industry, from tool and machine tool construction and from watchmaking and medical technology.

As a board member and CEO, Dr. Op de Hipt used his experience to develop the company and its strategy. He was responsible for recruiting suitable managers and ensured long-term loyalty to the companies through his empathetic leadership.

In his roles as CTO and COO in small and medium-sized companies, he developed turnkey production systems, machines and tools and integrated them into fully digitalized production solutions.

He has personally managed the areas of research & development, production as well as quality and project management on an international level for many years.

Dr. Op de Hipt studied mechanical engineering at RWTH Aachen University and obtained his doctorate in the field of materials technology. He then moved into international mechanical and plant engineering, where he developed and marketed high-performance machine tools, precision tools and lean process solutions for renowned companies. He completed his training in corporate management and business administration with an NDS.

His passion is to bring innovative companies together with the right managers. Successfully implementing this, even in difficult market situations, motivates him anew every day.

In his free time, he enjoys exploring the wonderful natural surroundings of Switzerland with his family and friends - and recharging his batteries.
